- Offerings: illuminate Clinical Data Hub & Technology Enabled Data Services
- Experience: 100+ Clients, 1000+ studies, 50+ illuminate clients
- Medidata accredited partner for 11+ years with in-depth knowledge and experience across all Medidata products
- Deep therapeutic area expertise in Oncology, Immuno-Oncology and Rare Disease

## Platform

**illuminate® Clinical Data Hub** A proven end to end platform designed to rapidly import data across many types and sources, transform and standardize data and publish it for useful role-based data driven and operational analytics. Used by top 15, mid-size and emerging life sciences companies, illuminate supports a modern and efficient clinical data strategy for comprehensive and streamlined data review by data management, clinical operations, medical monitors and safety. Powerful self-service analytics and visualizations reduce reliance on programmed listings.

## illuminate® PRODUCTS

- **Data Central** Single, integrated application for comprehensive data review and management from any data source. Supports incremental data review, reconciliation, issue tracking and graphical patient profiles. Used by Data Managers, Medical Monitors, Safety Reviewers and Clinical Operations to provide self-service access to clinical data and to identify and track issues using visualizations and listings.
- **Mapper** Unique application with a drag-and-drop interface allowing non-programmers to rapidly set up connections to numerous data sources, perform complex data transformations to SDTM and other standard formats, and publish curated data for analytics.
- **Analytics** Powerful clinical and operational visualizations for use by Clinical Operations, Data Management, Medical and Safety along with the ability to build ad-hoc visualizations.
- **Risk Based Monitoring** Configurable KRIs and analytics from real-time across any data source that enable insightful views into the most common risk aspects of clinical data quality, monitoring and site performance.
- **Data Hub** One place to store all your ongoing and archived studies for data access and cross trial analytics.

## TECHNOLOGY ENABLED CLINICAL DATA SERVICES

eCS offers a broad suite of technology enabled Clinical Data Services to ensure your project has the highest quality and regulatory-compliant clinical data deliverables, from acquisition through submission. The experienced eCS Professional Services team utilizes data management best practices and illuminate driven optimized data review processes resulting in client success from acquisition through submission.

### Data Management Services

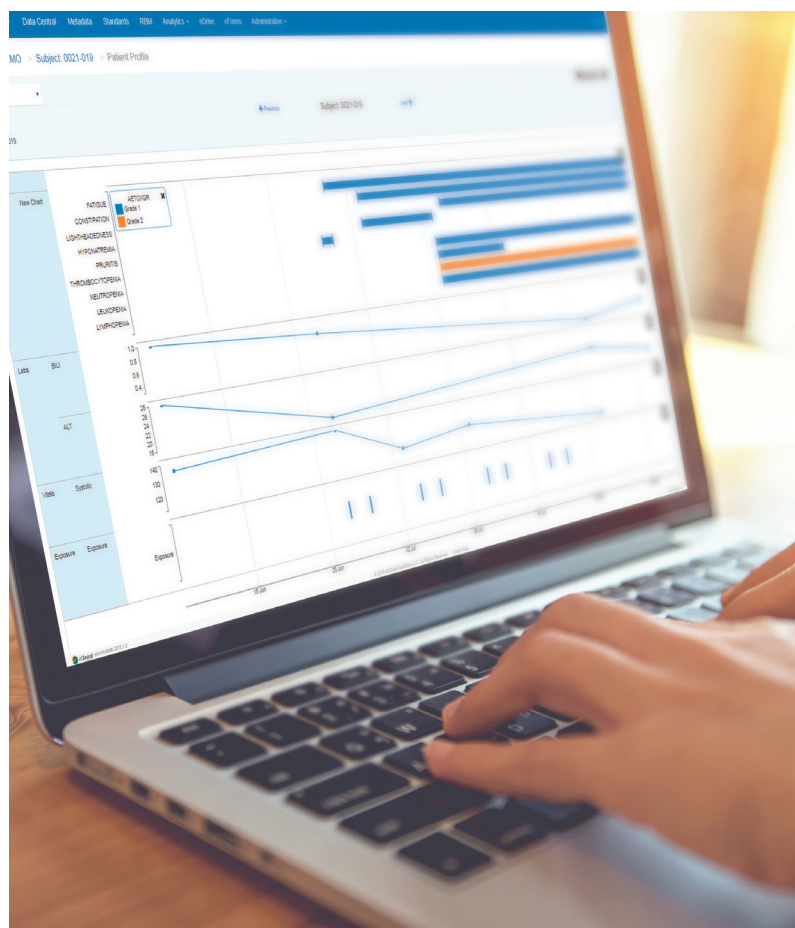

- Data acquisition services include high quality database builds and libraries using Medidata Rave Clinical Cloud
- Quality-driven data review and management from FPI through lock, for faster submission preparation
- Optimized data review, metrics, and analytics through illuminate

### Biostatistics & Programming

- Strategic statistical input and programming including submission Ready SDTM and ADaM deliverables
- Statistical analysis plan preparation including Mock TLFs
- TLF generation for Interim Analysis/Final Analysis/DSMBs comprehensive ISS, ISE services

### Data Management Functional Service Provider

- Flexible FSP model provides an expert team of dedicated clinical data management professionals who are an extension of the sponsor — maximizing quality while reducing costs
- Design and build of client data standards, SOPs and libraries
- Powered by illuminate and Medidata Rave Clinical Cloud to deliver best-in-class technology enabled services
